ship console

Specifications & features continued:

- Electronic multi coin mechs fitted as standard. Note acceptors also available (currency restrictions may apply). Alternatively, can be supplied ready to interface with customer's own card swipe system.
- Electronic credit display allows the operator complete control over the price of play.
- Pirate Ships are fitted with our proven transmission system using super quality Swiss Maxon motors. These give greater service life and use up to 70% less current than cheaper alternatives, resulting in improved battery life and longer running between charges.

ship model

Specifications & features:

- With no direct staffing, our standard "Genesis" technology provides the desired minimal maintenance, excellent payback and consistent profits.
- Woodgrain effect tops with sails, rigging, realistic decals and colour matched hulls. Mahogany steering wheels fitted as standard to complement the theme.
- Available in sets of 4,6,8,10 or 12 models, see recommended area sizes over.
- Pirate hulls are manufactured from fibre glass and are extremely hard wearing but in addition are also filled with foam for extra strength and protection. Boat tops are manufactured from either woodgrain effect PVC or coloured PVC.
- Our most popular 80cm boat with indoor or outdoor operation and all age appeal.

pirate ship installation

example shown 6 models

remote control boats are ideal for most types of pool, either existing water areas or purpose built pools

existing water areas that are too large can easily be converted with the installation of a floating boom, see opposite

add extra features and appeal to your play area with our optional accessories including lighthouse, navigation buoys and marina pontoons

picture shows matching brown coloured fibre glass consoles and steering positions and option of floating boom to enclose play area

typical console mounting fence

Standard Pirate Ship set includes: (example 6 model unit)

- 1 master twin console. Power supply unit provides 24V AC and must be located within 9 metres of this console. 2 slave consoles which connect directly to the master console via standard 6 metre cables. PVC covers.

- 6 Pirate Ship boats. See examples below, standard unit supplied with brown fibre glass hulls and PVC woodgrain effect tops. Other colour combinations are available.

- 12 batteries (one spare battery per boat) and 6 module battery charger (115 - 230V), must be stored indoors. 1 power supply unit (115-230V), can be located outdoors.

- Comprehensive spares pack and manuals. Please refer to installation recommendations for more information.
